Subject Index of Volume 54

Absorption spectra
absorption spectra of trialkylsilyl radicals by a chemical modulation experiment, 19
polarized absorption and emission spectra of stilbazolium merocyanines, 37
Acid transformation
novel type of fluorescence during dark transformation of nicotinamide coenzyme dimers in strong acidic media, 333
Actinometer
quantum yield of perfluoroglutaryl dichloride and 4-chloroperfluorobutanoyl chloride in gas phase: possible use as actinometers, 181
Amines
stilbene–amine exciplexes. Substituent effects, 299
Amplified emission
photophysics of 7-diethylamino-4-methylcoumarin: picosecond time-resolved absorption and amplified emission study, 263
Antioxidants
spectroscopic and photophysical properties of some biological antioxidants: structural and solvent effects, 349
Atom recombination
direct excitation of xenon as a third body in the process of $N(^4S)$ atom recombination, 139
Azaindole
fluorescence characteristics of 7-azaindole in highly acidic and basic aqueous media, 57
Azocine derivatives
the synthesis of azocine derivatives by the photocyclo-addition of phenols to 1-naphthonitrile and 4-methoxy-1-naphthonitrile, 99

Benzimitazole
proton transfer reactions of benzimidazole in ionic micelles in the excited singlet state, 219
Benzoylacetanilides
photoinduced tautomerism of some benzoylacetanilides in solution and polymer films, 119
Bipyridine
laser flash photolysis of 2,2′-bipyridine in aqueous solution, 63

Carbazole
fluorescence quenching of carbazole by tropanic alkaloids, 49
Carbonyls
spectroscopic behaviour of several carbonyl compounds in a cold remote nitrogen plasma, 273
Chemical actinometry
chemical actinometry between 670 and 795 nm, 27
Chemiluminescence
electrogenerated chemiluminescence of cyclic hydrazides in an alkaline Brij35 micellar system, 311

Density matrix
application of the density matrix method to the primary electron transfer in photosynthetic reaction centers, 321
Dimers
novel type of fluorescence during dark transformation of nicotinamide coenzyme dimers in strong acidic media, 333
Dye molecules
polarized absorption and emission spectra of stilbazolium merocyanines, 37

Electron transfer
application of the density matrix method to the primary electron transfer in photosynthetic reaction centers, 321
efficient production of methyl viologen cation radicals using Ru^{II} systems, 283
oxalate ion as a sacrificial electron donor in the $Ru(bpy)_3^{2+}$-methylviologen model photochemical system, 197

Elsevier Sequoia/Printed in The Netherlands

Electronic absorption
fluorescence characteristics of 7-azaindole in highly acidic and basic aqueous media, 57
Emission spectra
polarized absorption and emission spectra of stilbazolium merocyanines, 37
Emission spectroscopy
spectroscopic behaviour of several carbonyl compounds in a cold remote nitrogen plasma, 273
Energy transfer
direct excitation of xenon as a third body in the process of $N(^4S)$ atom recombination, 139
energy transfer from the triplet state of 2-acetyl-naphthalene to Eu^{3+} in micellar solutions, 213
Equilibrium constants
thermal and photochemical studies of the system 18-molybdodiphosphate and iodide, 31
Exciplexes
stilbene–amine exciplexes. Substituent effects, 299
Excitation
$HCl(B^1\Sigma^+ \rightarrow X^1\Sigma^+)$ fluorescence induced by ArF laser resonant absorption of vibrationally excited $HCl(X^1\Sigma^+)$ produced photochemically, 11

Flash photolysis
photochemistry of novel 4-alkylamino benzophenone initiators: a conventional laser flash photolysis and mass spectrometry study, 367
studies of photoinduced tautomerism of 2-hydroxyphenazine using flash photolysis, 293
Fluorescence
fluorescence characteristics of 7-azaindole in highly acidic and basic aqueous media, 57
fluorescence quenching of carbazole by tropanic alkaloids, 49
$HCl(B^1\Sigma^+ \rightarrow X^1\Sigma^+)$ fluorescence induced by ArF laser resonant absorption of vibrationally excited $HCl(X^1\Sigma^+)$ produced photochemically, 11
stilbene–amine exciplexes. Substituent effects, 299
Fluorescence lifetimes
spectroscopic and photophysical properties of some biological antioxidants: structural and solvent effects, 349

Furan rings
synthesis and photodimerization of 2,5-furandiacrylic acid, 129

Hydantoin
photoinduced stereospecific formation of substituted hydantoin from hexobarbital, 187
Hydration
novel type of fluorescence during dark transformation of nicotinamide coenzyme dimers in strong acidic media, 333
Hydrazides
electrogenerated chemiluminescence of cyclic hydrazides in an alkaline Brij35 micellar system, 311
2-Hydroxyphenazine
studies of photoinduced tautomerism of 2-hydroxyphenazine using flash photolysis, 293

Iodine
thermal and photochemical studies of the system 18-molybdodiphosphate and iodide, 31
Isotope separation
isotope selective IR multiphoton dissociation in an efficient laser waveguide reactor, 159

Laser dyes
a study of the triplet state of 7-amino coumarin laser dyes the nanosecond pulse radiolysis technique, 251
Laser flash photolysis
laser flash photolysis of 2,2′-bipyridine in aqueous solution, 63
mathematical model for the measurement of pseudo-first-order rate constants in laser flash photolysis experiments, 1
protonation kinetics of the triplet state of safranine in hydroxylic solvents, 73
Luminescence
excimer formation in irradiated high density polyethylene doped with aromatics, 389

Mass spectrometry
photochemistry of novel 4-alkylamino benzophenone initiators: a conventional laser flash photolysis and mass spectrometry study, 367

Methyl aromatics
oxidation of methyl aromatic compounds by redox photosensitization, 79
Methyl viologen
efficient production of methyl viologen cation radicals using Ru^{II} systems, 283
Methylviologen
oxalate ion as a sacrificial electron donor in the $Ru(bpy)_3^{2+}$-methylviologen model photochemical system, 197
6-Methoxyquinoline
photophysics of protonated 6-methoxyquinoline: steady state and time-dependent fluorescence, 239
Molybdodiphosphate
thermal and photochemical studies of the system 18-molybdodiphosphate and iodide, 31
Multiphoton dissociation
isotope selective IR multiphoton dissociation in an efficient laser waveguide reactor, 159

Naphthalene
excimer formation in irradiated high density polyethylene doped with aromatics, 389
Nitrogen plasma
spectroscopic behaviour of several carbonyl compounds in a cold remote nitrogen plasma, 273

Organochlorine
photocatalytic degradation of organochlorine compounds in suspended TiO_2, 113
Oxidation
oxidation of methyl aromatic compounds by redox photosensitization, 79

Photocatalysis
photocatalytic degradation of organochlorine compounds in suspended TiO_2, 113
Photoconduction
singlet exciton processes in a sensitized organic photoconductor, 171
Photocyclization
photochemistry of pyridinium salts 2: photobiscyclization of *N*-azomethine pyridinium derivatives, 91
Photocycloaddition
the synthesis of azocine derivatives by the photocycloaddition of phenols to 1-naphthonitrile and 4-methoxy-1-naphthonitrile, 99
Photodimerization
synthesis and photodimerization of 2,5-furandiacrylic acid, 129
Photoinitiator
photochemistry of novel 4-alkylamino benzophenone initiators: a conventional laser flash photolysis and mass spectrometry study, 367
Photoisomerization
preparation of two novel spermine alkaloids by *E/Z* isomerisation of the cinnamoyl chromophore, 105
Photoketonization
photoinduced tautomerism of some benzoylacetanilides in solution and polymer films, 119
Photolysis
absorption spectra of trialkylsilyl radicals by a chemical modulation experiment, 19
quantum yield of perfluoroglutaryl dichloride and 4-chloroperfluorobutanoyl chloride in gas phase: possible use as actinometers, 181
Photon flows
chemical actinometry between 670 and 795 nm, 27
Photo-oxidation
photoinduced redox reactions of $Fe(bipy)_2(CN)_2$ and $Fe(bipy)_2(CN)_2^+$ in homogeneous and micellar solutions, 205
Photopolymerization
synthesis and photodimerization of 2,5-furandiacrylic acid, 129
Photoreduction
photoinduced redox reactions of $Fe(bipy)_2(CN)_2$ and $Fe(bipy)_2(CN)_2^+$ in homogeneous and micellar solutions, 205
Photosensitization
oxidation of methyl aromatic compounds by redox photosensitization, 79
Photosynthesis
application of the density matrix method to the primary electron transfer in photosynthetic reaction centers, 321
Polyethylene
excimer formation in irradiated high density polyethylene doped with aromatics, 389

Proton transfer
proton transfer reactions of benzimidazole in ionic micelles in the excited singlet state, 219
Protonation
protonation kinetics of the triplet state of safranine in hydroxylic solvents, 73
Pulse radiolysis
a study of the triplet state of 7-amino coumarin laser dyes the nanosecond pulse radiolysis technique, 251
Pyrene
excimer formation in irradiated high density polyethylene doped with aromatics, 389
Pyridinium salts
photochemistry of pyridinium salts 2: photobiscyclization of *N*-azomethine pyridinium derivatives, 91

Quantum yield
quantum yield of perfluoroglutaryl dichloride and 4-chloroperfluorobutanoyl chloride in gas phase: possible use as actinometers, 181
spectroscopic and photophysical properties of some biological antioxidants: structural and solvent effects, 349

Rate constants
mathematical model for the measurement of pseudo-first-order rate constants in laser flash photolysis experiments, 1
Rhodamine B
absorption and fluorescence spectra of rhodamine B molecules encapsulated in silica gel networks and their thermal stability, 231
Rutherium (2,2′-bipyridine)
oxalate ion as a sacrificial electron donor in the $Ru(bpy)_3^{2+}$-methylviologen model photochemical system, 197

Safranine
protonation kinetics of the triplet state of safranine in hydroxylic solvents, 73

Silanes
absorption spectra of tri
by a chemical modula
ment, 19
Spermine alkaloids
preparation of two novel
loids by *E*/*Z* isomeris
namoyl chromophore,
Stilbene
stilbene–amine exciplexes
fects, 299

Tautomerism
studies of photoinduced
2-hydroxyphenazine u
tolysis, 293
Thermal stability
absorption and fluoresce
rhodamine B molecul
in silica gel networks
mal stability, 231
Time-resolved absorption
photophysics of 7-diethyl
coumarin: picosecond
absorption and ampli
study, 265
Time-resolved emission spe
photophysics of protonat
quinoline: steady stat
pendent fluorescence
Time-resolved fluorescence
singlet exciton processes
organic photoconduct
Triplet formation
laser flash photolysis of
in aqueous solution,
Tropanic alkaloids
fluorescence quenching
tropanic alkaloids, 49

Vinyl chloride
$HCl(B^1\Sigma^+ - X^1\Sigma^+)$ fluo
by ArF laser resonan
vibrationally excited
duced photochemical

Xenon
direct excitation of xen
body in the process
recombination, 139

Proton transfer
proton transfer reactions of benzimidazole in ionic micelles in the excited singlet state, 219
Protonation
protonation kinetics of the triplet state of safranine in hydroxylic solvents, 73
Pulse radiolysis
a study of the triplet state of 7-amino coumarin laser dyes the nanosecond pulse radiolysis technique, 251
Pyrene
excimer formation in irradiated high density polyethylene doped with aromatics, 389
Pyridinium salts
photochemistry of pyridinium salts 2: photobiscyclization of *N*-azomethine pyridinium derivatives, 91

Quantum yield
quantum yield of perfluoroglutaryl dichloride and 4-chloroperfluorobutanoyl chloride in gas phase: possible use as actinometers, 181
spectroscopic and photophysical properties of some biological antioxidants: structural and solvent effects, 349

Rate constants
mathematical model for the measurement of pseudo-first-order rate constants in laser flash photolysis experiments, 1
Rhodamine B
absorption and fluorescence spectra of rhodamine B molecules encapsulated in silica gel networks and their thermal stability, 231
Rutherium (2,2′-bipyridine)
oxalate ion as a sacrificial electron donor in the $Ru(bpy)_3^{2+}$-methylviologen model photochemical system, 197

Safranine
protonation kinetics of the triplet state of safranine in hydroxylic solvents, 73
Silanes
absorption spectra of trialkylsilyl radicals by a chemical modulation experiment, 19
Spermine alkaloids
preparation of two novel spermine alkaloids by *E/Z* isomerisation of the cinnamoyl chromophore, 105
Stilbene
stilbene–amine exciplexes. Substituent effects, 299

Tautomerism
studies of photoinduced tautomerism of 2-hydroxyphenazine using flash photolysis, 293
Thermal stability
absorption and fluorescence spectra of rhodamine B molecules encapsulated in silica gel networks and their thermal stability, 231
Time-resolved absorption
photophysics of 7-diethylamino-4-methylcoumarin: picosecond time-resolved absorption and amplified emission study, 263
Time-resolved emission spectroscopy
photophysics of protonated 6-methoxyquinoline: steady state and time-dependent fluorescence, 239
Time-resolved fluorescence
singlet exciton processes in a sensitized organic photoconductor, 171
Triplet formation
laser flash photolysis of 2,2′-bipyridine in aqueous solution, 63
Tropanic alkaloids
fluorescence quenching of carbazole by tropanic alkaloids, 49

Vinyl chloride
$HCl(B^1\Sigma^+ \rightarrow X^1\Sigma^+)$ fluorescence induced by ArF laser resonant absorption of vibrationally excited $HCl(X^1\Sigma^+)$ produced photochemically, 11

Xenon
direct excitation of xenon as a third body in the process of $N(^4S)$ atom recombination, 139
